EXPERIENCE

University of Pennsylvania Front-End Web Developer September 2018 - Present

I'm currently the Front-end developer at Penn for their department of communications. We maintain upenn.edu, the Penn Today news publication, and several other public facing websites for the University. Our team supports the Office of the President. I've worked extensively within Drupal builds at this position. I'm also responsible for email campaigns and I worked on the recent upenn.edu flagship redesign.

1Trick Pony Front-End Web Developer May 2012 - 2018

I worked on projects for clients including Disney, American Express, Virgin(Mobile/Hotels/America), Hard Rock Hotels, Turner Classic Movies, and Sony Pictures Classics primarily in Wordpress and Laravel. I communicated with account managers and other developers in a very fast paced team environment. I took the lead developer role on several builds at 1 Trick Pony and I'm experienced with managing my time and hitting deadlines.
